

Underwater Cable and Connectors End User Workshop

Friday, April 4, 2008

An all-day workshop presented by the San Diego Chapter of the Marine Technology Society
www.mts-sandiego.org

Underwater cables and connectors provide system flexibility, ease of service, and other advantages to undersea designers. This one-day workshop will help end-users identify and prioritize critical decisions that will lead to the best connector and cable system for their application.

Southern California leaders in underwater cables, connectors, and testing will present a straightforward full day session to help both end-users and manufacturers achieve success.

Topics to be covered include:

- Application and Field Requirements
- Mechanical Design
- Materials
- Electrical Design
- Cable Construction
- Bonding
- EM Terminations
- Specifications
- QA/QC
- Testing
- Interchangeability
- Pricing and Delivery

Military Specifications, ISO, and other international standards will supplement the day's presentations.

Cost is \$50 for MTS members, \$65 for nonmembers
